

NAMELESS

Combat Physical Playtest Rulebook

Prototype Edition — For Playtesters Only

This booklet contains the rules for the physical prototype of Nameless, an duelling game of wagers, fate, and tactical manipulation.

All components, mechanics, and visuals are work-in-progress and subject to change based on your feedback.

FindPineapple Studios

Prototype v0.1 — Not for resale

Thank you for being the guinea pigs of our debut game, *Nameless*. You're helping shape this game while it's still messy, experimental, and rough. Your honesty, critique, and patience are deeply appreciated — and most importantly, we hope you have fun.

If you'd like to join future playtests or stay updated on the game's progress, **scan the QR code below to join our Discord server.**

What to Expect

This is an early prototype.

- The art is temporary
- The balance is rough
- The rules might need to be adjusted (that's what you are here for!)

What We Need From You

Please focus your feedback on:

- Clarity— what confused you
- Flow — what felt smooth or clunky
- Fun — what moments felt exciting or frustrating. Was the gameplay loop interesting at its core.
- Balance — any cards that felt too strong or too weak
- Traps — did they feel fair, predictable, or annoying
- Strategy — did your choices feel meaningful
- Design – Were the cards easy to read and understand

Short notes are perfect — don't overthink it.

What You Need to Play

Each player needs:

- A deck of made up of **15 cards**
 - The playtest comes with 30 cards (please experiment with the building different decks)
 - 10 Phase 1 cards
 - 10 Phase 2 cards
 - 10 Trap cards
- 1 d6 Dice (at least 2 if possible, there are some cards effects that let you roll multiple dice)
- Some way to record Health pool
 - this could be 12 tokens
 - A piece of paper to keep track

Optional: a pen and paper for notes.

The Wager

At the start of each round, the players will select a wager, the wager dictates which trap cards can be played and what wager bonuses the players receive. Once a round has been completed the Loser will remove their wager HP from their Health Pool (starts with 12HP)

- A high risk wager (⚡⚡⚡)
 - Wagering 5 HP
 - Allows for some strong card effects
- A medium risk Wager (⚡⚡)
 - Wagering 3 HP

- Middle ground card effects
- A low risk wager (⚡)
- Wagering 2 HP
- Safe card effects

The Deck

There are the cards are split into 3 categories which can be identified as follows

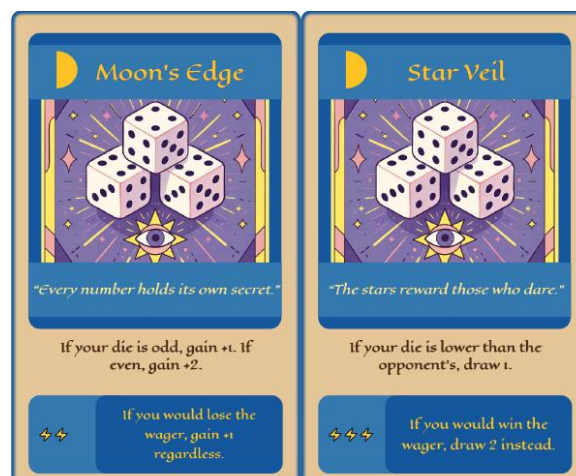

Phase 1 Cards

- These cards have Purple Details
- A ♠ at the top left of the card next to the card name
- These cards are played before the dice are rolled and are designed to influence the dice themselves

Phase 2 Cards

- These cards have Blue details
- A ♠ at the top left of the card next to the card name
- These cards are played after the dice have been rolled and are designed to influence the result of the dice

Trap Cards (default rules)

- These Cards have black details
- A ● at the top left of the card next to the card name
- These cards can be played in either phase 1 or 2 face down
 - They can only be played when the player has wagered the matching level of risk
 - They can not be triggered the same round they are placed
 - You can only play 1 trap card at a time

Alternate rules for trap cards

Optional Trap Experiments

The rules above are the **default rules used for this playtest.**

Given the evolving nature of the prototype, below are alternative trap rules we encourage you to try after playing a few rounds with the default.

Alternative Rule #1

Trap cards can be played immediately straight from the hand if the conditions are met and you are using the matching wager type

Alternate Rule #2

Trap cards are played at the END of a round, and are based on the **opponent's wager**, not yours. They arm **immediately** and just **activate when the condition is triggered**

How to Play (Round Structure)

Before starting

- build your own deck made up of 15 cards
 - it is recommended to try have 5 of each (Phase 1, Phase 2, Trap) but feel free to build the deck how you want
- Each player deals themselves 5 cards to their hand
- Each Player starts with 12 HP

1. Choose a Wager

Both players secretly choose a wager and reveal. Wagers determine:

- which **wager bonuses** can activate
- which **trap** cards can be **set up this round**

2. Phase 1

Both players play **one Phase 1 card** face-up. These modify dice **before** rolling. They can be played at any wager but only gain their **wager bonus** if the wager matches.

3. Roll Dice

Roll your dice pool, adjusted by Phase 1 effects.

4. Phase 2

Both players play one **Phase 2 card** face-up. These modify **dice after rolling**. They can be played at any wager, but only gain their **wager bonus** if the wager matches.

5. Resolve Totals

Apply all modifiers. Highest total wins the round.

- The Loser will remove their wager HP from their total Health Pool
- In the case of a draw no damage is taken on either side

Preparing for the Next Round

- Discard all Phase 1 and Phase 2 cards from the play area into their owner's discard pile
- Any face-down Traps remain in play until triggered
- Each player draws ****1 card****, unless an effect instructs otherwise
- If a player's deck is empty, shuffle their discard pile to form a new deck

Trigger Traps

Reminder (Default rules)

If you armed a trap last round, it becomes **active this round**.

When its condition is met, the **trap triggers immediately**.

- Traps are played face-down during Phase 1 or Phase 2
- They do nothing the round they are played
 - They may trigger **at any point in the next round** when their condition is met

- Only **one trap** may be armed at a time

NOTE: Try give alternative trap rules a try after playing a game with the default rules (see under Trap Cards for a reminder)

How to Win

Outplay your opponent and reduce their HP to 0.
